# OWNER TO FURNISH AND INSTALL THE FOLLOWING

1. All Escalator Supports, including Bearing Plates if concrete beams are used.
2. Vent grilles for machine space - net vent area = 4 sq. ft. - 32R 6 sq. ft. - 48R
3. Hinged Panels on incline and lower landing for access to Interior of Escalator, each with light and Receptacle.
4. Railing or Fireproof Enclosure around upper floor Well Opening.
5. Plaster or other suitable finish to enclose entire installation and all builders' work adjacent thereto.
6. Electric Current Feed Wiring.

## NOTES

A-Finished Wellway Dimensions are given on Layout. Architect to determine required size of Rough Wellway, depending on thickness of finish used.

B-Escalator Supports should be designed for the Loads given on Layout.

Loads are to be considered uniformly distributed on Cross Beams.

Loads include Live Load and plaster on Sides and Soffit of Escalator, but do not include Fireproof and Enclosure, Well Railing or similar items. Moving loads are approximately 35% of the total loads given on plans.

C-Supports are not to be Fireproofed until Escalator Truss is in place.

D-Flooring around Escalator Openings is not to be laid until Escalator is installed.

E-For standard dimensions and general Escalator information - see A416.

F-Access Door - By O.E. Co. - Floor Fill - By Others.

Escalator Width 48"

Passengers Per Hour.

Speed of Steps - 90 F.P.M./120 F.P.M.

Rated Capacity 8,000 & 10,500

Current 480 V.C.T.S.

Angle of Escalator Incline
